Education

National Yang Ming Chiao Tung University (NYCU) *Jul 2026 – Present*

Electronics and Photonics Post-undergraduate Second Degree Program
First-year student | Expected graduation: Jun 2028
Completed summer coursework: **Calculus (A+)**; **General Physics (A+)**.
Current coursework: Electronics (I), Electronic Laboratory, Semiconductor Processing.

National Chiayi University (NCYU), Chiayi, Taiwan *Sep 2019 – Jun 2024*

Bachelor of Arts in **Applied Economics**, College of Management.

Research Interests

Seeking an undergraduate research opportunity in GaN power devices and p-GaN HEMT reliability to understand how operating conditions affect on-resistance, gate characteristics and device stability. I hope to begin with literature and data organization, then develop experimental skills under supervision.

Work Experience

Chung-Hsin Electric & Machinery Manufacturing Corp. *Nov 2024 – Jun 2026*

Project Engineer, Offshore Wind Power Department

- Coordinated substation EPCI schedules and cross-team follow-up for the onshore infrastructure of the 495 MW F4 offshore wind project; tracked milestones in **Oracle Primavera P6 EPPM** and presented progress using **Power BI**.
- Participated in harmonic filter integration meetings with GE and variable shunt reactor integration meetings with Siemens, supporting technical communication and English-language documentation.
- Contributed to **AI-assisted technical translation** and **Oracle Aconex** document-control improvements, drawing on experience with technical information and approval workflows.

Professional Development

Technical and Engineering Training

Pursued training while employed: Verilog/FPGA digital logic, Python data analysis and OpenCV; semiconductor coursework at NYCU's Laser System Research Center.
Attended English speaking courses at Tamkang University.
Planned research preparation: GaN HEMT operation, gate leakage and stress-induced electrical changes.

Other Skills and Availability

Languages: Mandarin (native); English (**TOEIC 870**), with technical-document experience.
Tools used: LTspice, Tinkercad, Oracle Primavera P6 EPPM, Oracle Aconex, Power BI and Microsoft Office.
Availability: At least 10 hours per week, with continued participation during winter and summer breaks; planning to remain involved through graduation in Jun 2028.
